HERMES Survey Kiosk

The **HERMES Survey Kiosk** has been accessed to capture feedback from parents, students and teachers by over 500 schools in the last year.

The Kiosk provides the most advanced survey service for schools available anywhere.

radii.org will:

- provide telephone support for each school to **run surveys throughout 2008** (with no limit on the number of surveys or responses)
- provide a **report** for each survey and assist in interpreting the report
- translate specific parent surveys into required community languages
- support schools to **build surveys** from the 200+ topics in the HERMES Library and add new topics and questions as required
- provide a workshop on how to build and run surveys
- train CEO staff to support schools via a **help-line**.

This special offer provides access to all the advanced features of the **HERMES Survey Kiosk** to support

schools to gather information about their environment.

- Use **adaptive 'drill-down' questions** based on previous responses — to enhance interpretation of the data — eg. a disgruntled student can be asked follow-up questions to find out what is bugging them.
- **Tailor surveys to the needs of your school** — select questions by topic and add your own questions.
- **Customise** your survey so it has the same look-and-feel as your website.
- Make a **1-click duplicate** of your survey to share it with colleagues.
- Issue 1-time user codes if you are concerned about 'multiple voting'.
- Send invitational surveys by email to randomly selected parents, etc.
- Send **automated reminders** to ensure a high response rate.
- **Reports generated automatically.**
